SafeGel Red Stain

– Your Safe and Efficient Gel Staining Solution –

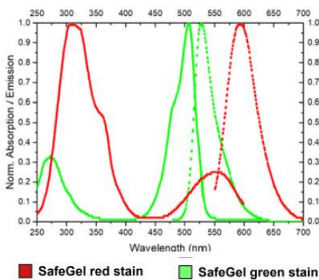

Why Choose SafeGel Red Stain (M3193)?

- ✓ Safer than EtBr
- ✓ Easy disposal
- ✓ Extremely stable
- ✓ Perfectly compatible with a standard UV transilluminator
- ✓ Ultra-sensitive: Much more sensitive than EtBr with much lower background

Need to Use a Blue Light Transilluminator?

Try SafeGel Green Stain (M3191)

- ✓ Same high sensitivity as SafeGel Red Stain
- ✓ Excited with blue light for flexible imaging options

SafeGel offers a simple, safer alternative to EtBr without compromising sensitivity or performance. With ease of use and eco-friendly disposal, it's the perfect solution for labs aiming to streamline their workflow while maintaining high-quality results.
